Just Kiss Me-Rachel Gibson
2016-07-26 New York Times
bestselling author Rachel
Gibson returns with this
dazzling love story filled with
sizzle, sass, and just a bit of
southern charm . . . "Hello,
Ms. Vivian . . . it's been a long

time." And with those words, Vivian Leigh Rochet nearly melted. It's been years since she last saw Harrison Whitley-Shuler. She was a teenager scrubbing houses for a living. He was the gorgeous son of rich parents, not fit for the likes of her. Vivian had vowed to get out of Charleston, become a big Hollywood star, and stick it to the snooty girls who made her cry. She got what she wanted—and more—but why does her glamorous life seem so trivial? Harrison got out too . . . making it all the way to Wall Street, until a heart attack forced him to trade in his cufflinks for a good set of hand tools. Making furniture soothes his soul, but escaping the Whitley-Shuler heritage is nearly impossible. And now he's come face-to-face with the one who got away. He's not looking for love. He's not even looking for sex . . . so why is resisting her the hardest thing he's ever done?

Stereo: Comparative Perspectives on the Sociological Study of Popular Music in France

and Britain-Philippe Le Guern 2016-04-01 The term 'Popular Music' has traditionally denoted different things in France and Britain. In France, the very concept of 'popular' music has been fiercely debated and contested, whereas in Britain and more largely throughout what the French describe as the 'Anglo-saxon' world 'popular music' has been more readily accepted as a description of what people do as leisure or consume as part of the music industry, and as something that academics are legitimately entitled to study. French researchers have for some decades been keenly interested in reading British and American studies of popular culture and popular music and have often imported key concepts and methodologies into their own work on French music, but apart from the widespread use of elements of 'French theory' in British and American research, the 'Anglo-saxon' world has remained largely ignorant of particular traditions of the study of popular music in France and specific theoretical debates or

organizational principles of the making and consuming of French musics. French, British and American research into popular music has thus coexisted - with considerable cross-fertilization - for many years, but the barriers of language and different academic traditions have made it hard for French and anglophone researchers to fully appreciate the ways in which popular music has developed in their respective countries and the perspectives on its study adopted by their colleagues. This volume provides a comparative and contrastive perspective on popular music and its study in France and the UK.

Booked for Christmas-Lily Menon 2020-10-13 Booked for Christmas, a novella from debut author Lily Menon, is sure to get readers in the holiday spirit! Novelist Sophia Hart (real name: Sophie Bartholomew-Kaur-Hughes, but try fitting that on a book cover) absolutely hates her loudest critic—Evan Wolfe, evil mastermind behind the Lone Wolfe book review column. They've never met, but Wolfe's favorite pastime seems to be dumping on Sophie's unapologetically happy, magical romances. Sophie, not one to be left behind, gets her revenge in her own ways (never annoy a writer in search of a villain). When Sophie decides to throw

a holiday party at her cabin, Wolfe is the last person on her mind. But the universe has a twisted sense of humor. Not only does Wolfe show up as someone's plus one, but a massive snowstorm blows in, stranding them both alone together in Sophie's cabin. Over the next few days, Sophie begins to realize that Wolfe isn't as odiously cynical a man as she'd originally thought. In fact, he's kind of...sweet. And impossibly hot. But still, Sophie's been hurt before and she has so much to lose. What she needs is one sure sign that she and Wolfe are meant to be together. Will Sophie and Wolfe get their Christmas miracle?

A Brief History of Drugs-

Antonio Escohotado
1999-05-01 A clear-eyed look at the instrumental role drugs have played in our cultural, social, and spiritual development. • First American publication of the surprising European bestseller. • Examines everything from the ancient use of ergot and datura to the modern phenomenon of "designer" drugs such as Ecstasy and crack cocaine. From remotest antiquity to the present era of designer drugs and interdiction, drugs have played a prominent role in the cultural, spiritual, and

social development of civilizations. Antonio Escohotado demonstrates how the history of drugs illuminates the history of humanity as he explores the long relationship between mankind and mind-altering substances. Hemp, for example, has been used in India since time immemorial to stimulate mental agility and sexual prowess. Aristotle's disciple Theophrastus testifies to the use of datura by the ancient Greeks and further evidence links the rites at Eleusis to the ingestion of a hallucinogen. Similar examples can be found in cultures as diverse as the Celts, the ancient Egyptians, the Aztecs, and other indigenous peoples around the world. Professor Escohotado also looks at the present-day differences that exist between the more drug-tolerant societies like Holland and Switzerland and countries advocating complete repression of these substances. The author provides a comprehensive analysis of the enormous social costs of the drug war that is coming under increasing fire from all levels

of society. Professor Escohotado's work demonstrates that drugs have always existed and been used by societies throughout the world and the contribution they have made to humanity's development has been enormous. The choice we face today is to teach people how to use them correctly or to continue to indiscriminately demonize them. "Just say no," the author says, is not an option. Just say "know" is. Antonio Escohotado is a professor of philosophy and social science methodology at the National University of Distance Education in Madrid, Spain. He travels widely, offering lectures and seminars on the subject of drugs and history.

Physical Chemistry for the Chemical and Biological Sciences-Raymond Chang
2000-05-12 Hailed by advance reviewers as "a kinder, gentler P. Chem. text," this book meets the needs of an introductory course on physical chemistry, and is an ideal choice for courses geared toward pre-medical

and life sciences students. Physical Chemistry for the Chemical and Biological Sciences offers a wealth of applications to biological problems, numerous worked examples and around 1000 chapter-end problems.

Explosion Protection-Heinrich Groh 2003-12-18
This book makes Hazardous or Electrical Area Classification simple. In plants processing flammable materials, every effort is made to avoid the escape of such materials and in addition, stringent measures are taken to exclude sources of ignition. A complex array of standards surround this topic which has led to an overly conservative approach being taken. This type of approach means that much more expensive electrical apparatus than is necessary is installed. To avoid this unnecessary expenditure, Dr Groh clearly explains the relevant standards, so that accurate assessment of the risks associated with hazardous areas is possible. He also identifies possible ignition sources and methods of

designing apparatus which do not cause sparks thereby maintaining safety. * Covers must-have information regarding IEC/CENELEC standards in electrical or hazardous area classification * Provides a clear overview of a complex area

Ford Madox Ford and the Misfit Moderns-Rob Hawkes
2012-09-18 Ford Madox Ford is a major figure of the modernist age, yet many of his works do not fulfil the expectations associated with the category of modernism. In *Ford Madox Ford and the Misfit Moderns*, the author

examines the ways in which Ford, alongside other 'misfit moderns' (Richard Aldington, Arnold Bennett, Joseph Conrad, Robert Graves, Siegfried Sassoon, H. G. Wells, and Rebecca West), destabilises the fundamental structures and forces that shape all narratives, from the processes of characterisation and plotting to the distinction between autobiography and fiction. In so doing, Ford exhibits a form of 'in-betweenness' that constitutes an exemplary responsiveness to the conditions of modernity whilst challenging many of our assumptions about early twentieth-century writing. Offering original readings of Ford's Edwardian fiction and First World War writing, this book poses wide-ranging questions about the nature of narrative and the distinction between modernism and modernity. -- Book cover.

Functional Categories in Language Acquisition-Annette Hohenberger
2002-01-01 This study investigates the acquisition of Functional Categories from the perspective of self-

organization. Syntax emerges through a major bifurcation of the dynamical language system. Dynamical notions such as precursor, oscillation, symmetry-breaking, and trigger are explanatory tools for the dynamics of early child language as evidenced in the acquisition of compounding, case-marking, finiteness, V2, wh-questions, etc. The book addresses researchers from various theoretical camps: generative, functional, connectionist, by giving new answers to old questions in the light of a novel challenging theory: self-organization.

Numerical Methods for Engineers and Scientists- Amos Gilat 2008 Following a unique approach, this innovative book integrates the learning of numerical methods with practicing computer programming and using software tools in applications. It covers the fundamentals while emphasizing the most essential methods throughout the pages. Readers are also given the opportunity to enhance their programming

skills using MATLAB to implement algorithms. They'll discover how to use this tool to solve problems in science and engineering.

Understanding and Managing Risk Attitude-

Dr David Hillson 2012-03-01

Despite many years of development, risk management remains problematic for the majority of organizations. One common challenge is the human dimension, in other words, the way people perceive risk and risk management. Risk management processes and techniques are operated by people, each of whom is a complex individual, influenced by many different factors. And the problem is compounded by the fact that most risk management involves people working in groups. This introduces further layers of complexity through relationships and group dynamics. David Hillson's and Ruth Murray-Webster's Understanding and Managing Risk Attitude will help you understand the human aspects of risk management and to manage proactively the influence of human behaviour on the risk process. The authors introduce a range of models, perspectives and examples to define and detail

the range of possible risk attitudes; looking both at individuals and groups. Using leading-edge thinking on self-awareness and emotional literacy, they develop a powerful approach to address the most common shortfall in current risk management: the failure to manage the human aspects of the process. All this is presented in a practical and applied framework, rather than as a theoretical or academic treatise, based on the authors' shared experiences and expertise, rather than empirical research. Anyone involved in implementing risk management will benefit from this book, including risk practitioners, senior managers and directors responsible for corporate governance, project managers and their teams. It is also essential reading for HR professionals and others interested in organizational or behavioural psychology. This second edition is updated to strengthen the understanding of individual risk attitudes and reinforce what individuals can do to manage those risk attitudes that are leading them away from their

objectives. For people who want to embrace this subject, the book highlights ways forward that are proven and practical.

The Reluctant Rapparee-

Jim McComish 2015 1743 County Downe Ireland. Shane McGrogan, the son of a farmer evicted from his land, has taken to the road as an outlaw fighting a guerrilla war against tyranny and oppression. He has recruited a small band of disparate outcasts ranging from hardened criminals to traumatised famine survivors. McGrogan hopes to fashion the band into an elite fighting unit, but when they botch a relatively simple ambush and are chased into a haunted wood by an angry militia, their mission becomes a matter of survival. Archie

McClung fell into being a rapparee due to his own peculiar circumstances; it is not the life that he would have hoped for. McGrogan aspires to fight for the common good, but McClung dreams of making a better life for himself. Cast into an extraordinary landscape where the physical world overlaps with the realm of spirits, the rapparees dare not trust their own senses let alone one another. Why has Shane risked everything by ambushing a guarded passenger coach? What amongst their ragged stash of recently pilfered possessions is stirring their enemies to hunt the rapparees so voraciously? Who is the mysterious Frenchman in their midst? And who will be the first to cut and run?
